

I believe that K-Love Radio should not be displaced by an LPFM broadcaster. K-Love Radio (94.3 locally) has served me and the community by providing positive, upbeat programming. A few years ago, at age 32, I came across K-Love radio. It literally changed my life. I was and am a normal, everyday person, but increasingly felt a lack of happiness and contentment in life. K-Love helped lead me to spiritual fulfillment and a change in my life. Two years later I still turn to K-Love to get away from all the negativity I hear on the radio. It would truly be a disservice to me and the community to replace positive and uplifting K-Love with a LPFM station. More and more our society lacks positive programming. We are constantly bombarded with negative messages in life. I ask you, for myself, the community and the 100s of thousands of K-Love listeners to keep K-Love as a priority station, to inspire the community to be productive, positive citizens.
